Other Projects
Applications

- **Background Remover:** I made a background remover web app because using PS took a lot of time. I used: **React.JS**, **Node.JS** and an **AI API**.
- **Image Cloud Storage:** This project allows users to solve images to the cloud using the web app or mobile application. The images in async because of real time data updates. I used: **ReactJS**, **React Native**, **Redux** with **Redux Toolkit** and **Firebase**.

- **URL Shorten**: I made this project so that I can shorten long URLs and share them without using bitly.com. I used **React.JS, Node.JS, MongoDB** and **Firebase.**

ABOUT ME

Hi my name is Sihle Kambula and I am passionate about software development, from building static websites using Next.JS to mobile and web applications using React, Redux, Firebase and NodeJS.

I love to solve problems using code. I care about clean code and I genuinely love to learn different technologies. I'm currently looking for the right opportunity to work in an environment that solves modern day problems using technology, to add value to the company, build amazing software and improving my skills.
